

Coventry By Earth Park Homes.

A Community that Continues to Grow

Stratford's only master-planned community launches its third phase

Having released several successful phases over the years, Coventry has become a renowned community in Stratford.

Since opening in 2013, Coventry has received rave reviews and redefined modern living in Stratford. Earth Park Homes has continued to create an expansive collection of home designs that cater to the needs of today's discerning home buyers. The community offers something for everyone with homes featuring spacious open-concept layouts, generously sized bedrooms, additional living spaces, private master ensuites and a wealth of designer finishes.

With immaculate interior design selections, quality finishing and the utmost attention to detail, Earth Park's impressive portfolio of homes captures the aspects of a living environment that are vital to a homeowner.

Coventry truly is a community suitable for every chapter of life. Featuring several phases, homeowners are able to select from a unique portfolio of designs, including executive townhomes and single family residences on a variety of lot sizes to accommodate current lifestyle requirements.

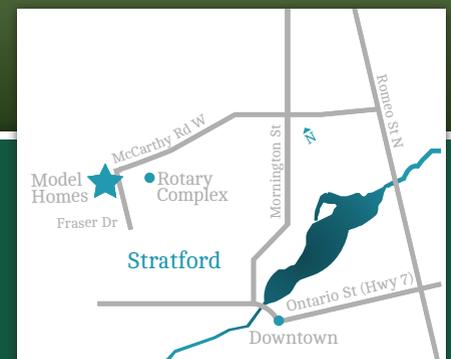

Coventry's first phase, Ashfield Park, rapidly sold out after its release in 2013. Exceptionally received by all, Ashfield Park is now well under construction and filled with over 60 single family dwellings and nine townhome blocks. Following the tremendous success of Ashfield Park, phase two, Birch Woods, was released in 2015. Now selling and well under construction, this phase features 40 spacious 52' single detached homes - the largest lots in the entire community.

Coventry's newest phase, Chelsea Green is the most sought after phase to date. Located along the peaceful perimeter of the master-planned community this new release features an entirely new collection of 42' single detached home designs. This phase boasts an abundance of nature and parks and is located in an ideal setting for a growing family. In each home, residents will enjoy spacious and intelligent layouts, Energy Star® certified designs, double car garages and an impressive host of standard finishes.

Earth Park Homes' dedication to excellence in construction and award-winning designs have been the contributing factors in making Coventry, Stratford's largest and most successful master-planned community.

Visitors can experience this growing community by viewing Model Home Row, three professionally decorated model homes located at the community's Sales Office, past the Rotary Complex at 82 Fraser Drive.
